Signal station explained

Signal stations were the only practical mean of communicating with passing ships until the development of radio, and played a critical role in both navigation safety and commercial operation of fleets.

All of the portable storage container rentals in Redding are guaranteed to be wind and water tight. WWT containers are guaranteed to not leak and are perfect for on site storage.

Signal station

A signal station is a form of aids to navigation that is defined by the IHO simply as "A signal station is a place on shore from which signals are made to ships at sea". While this broad definition would include coastal radio stations and fog signal stations, the term is most often used for shore installation that use visual signals to communicate with ships at sea.
