

Electric grid iraq

Voltage range

636V-876V

Rated voltage

768V

Cell type

Lithium iron phosphate

Overview

The IMF estimate that in 2020 less than half of supplied electricity was billed and less than a quarter paid for. The economics of Iraq's electricity sector is characterized by significant challenges related to supply, demand, infrastructure, and financial sustainability. These issues are compounded by the country's historical context of conflict, sanctions, and ongoing instability.
