

Glass reflects solar energy and solars

CE UN38.3 MSDS

Overview

Reflective glass features a thin metallic coating that reflects solar energy and enhances privacy by producing a mirror-like surface on one side. Both types optimize thermal performance and occupant comfort but differ in aesthetics and light management capabilities.

Exploring glass options: Solar Reflective Glass

Solar reflective glass, often referred to as "solar control glass," is a specialized type of glass designed to reflect a significant portion of the sun's

[Solar control glass , SunGuard glass products , Guardian Glass](#)

Solar Reflecting Coating How Is Solar Control Measured? Solar Heat Gain Or 'G' Value Light to Solar Heat Gain (Lshg) Or Selectivity Insulated Glass Unit Solar control performance is achieved through the use of a very thin, transparent, and permanent coating that helps limit the solar energy entering inside. It helps control solar gain to various levels depending on the coating while allowing natural daylight in and views on the outside. See more about how glass is coated. See more on guardianglass
