BMS customization supported

The advertisement features three stacks of white, rectangular solar telecom integrated cabinet inverters on wheels. The units are arranged in three stacks of increasing height, labeled with their capacities: 20 Kwh, 30 Kwh, and 50 Kwh. The background shows a house with a solar panel array on the roof. The overall design is clean and professional, highlighting the product's features and capacity options.

Overview

A copper grounding rod must be driven into the ground outside and connected to the single grounding point using a thick copper grounding wire. The electrical distribution panel is ideal for having a single grounding point.

Grounding of outdoor cabinet on roof of solar telecom integrated ca

Enhancing Inverter Protection Best Practices for Outdoor Installations

For some mountainous power stations, if the inverter is in a depression prone to water accumulation, it's recommended to move the inverters and distribution boxes to higher ground or
