

# How to test whether the UPS battery cabinet is connected correctly

## Overview

---

Before connecting the battery cables from the battery cabinet to the host, measure the battery voltage with a multimeter, which should be 103.36V, and check if the positive and negative leads are correctly connected.

## How to test whether the UPS battery cabinet is connected correctly

---

### Fit Testing , Personal Protective Equipment , CDC

The test is a pass/fail test that determines whether you can detect a test agent, such as through taste, smell, or an involuntary cough. The OSHA-accepted fit test protocols provide complete
