

Latest version of photovoltaic rigid support specification

Overview

IEC 62548-1:2023 sets out design requirements for photovoltaic (PV) arrays including DC array wiring, electrical protection devices, switching and earthing provisions.

Latest version of photovoltaic rigid support specification

Introducing Claude Opus 4.6

We're upgrading our smartest model. Across agentic coding, computer use, tool use, search, and finance, Opus 4.6 is an industry-leading model, often by wide margin.

NB/T 10668-2021 English Version - NB/T 10668-2021 Technical specification for testing and evaluation of fixed supporting bracket for photovoltaic (PV) power station (English Version):

Introducing Claude Haiku 4.5 \ Anthropic

Claude Haiku 4.5, our latest small model, is available today to all users. What was recently at the frontier is now cheaper and faster. Five months ago, Claude Sonnet 4 was a state-of-

[Advancing Claude in healthcare and the life sciences](#)

In October, we announced Claude for Life Sciences, our latest step in making Claude a productive research partner for scientists and clinicians, and in helping Claude to support those in

Claude 3.7 Sonnet and Claude Code

Today, we're announcing Claude 3.7 Sonnet, our

most intelligent model to date and the first hybrid reasoning model generally available on the market.

[IR 16-8: Solar Photovoltaic and Thermal Systems Review and](#)

This IR clarifies the requirements for structural support of solar systems, anchorage of solar systems, solar support frame systems, balance-of-system (BOS) equipment, and building-integrated

[Anthropic acquires Vercept to advance Claude's computer use](#)

Vercept is the latest team we've brought into Anthropic, following the acquisition of Bun. We look for teams whose technical ambitions match ours, whose work advances our capabilities,

Introducing Claude 4 \ Anthropic

Discover Claude 4's breakthrough AI capabilities. Experience more reliable, interpretable assistance for complex tasks across work and learning.

IEC 62548-1:2023

This document sets out design requirements for photovoltaic (PV) arrays including DC array wiring, electrical protection devices, switching and earthing provisions.

Introducing Claude Sonnet 4.6

Claude Sonnet 4.6 is a full upgrade of the model's skills across coding, computer use, long-reasoning, agent planning, knowledge work, and design.

Introducing Claude Sonnet 4.5 \ Anthropic

Claude Sonnet 4.5 is the best coding model in the world, strongest model for building complex agents, and best model at using computers.

IEC 62548-1:2023

IEC 62548-1:2023 sets out design requirements for photovoltaic (PV) arrays

Claude Opus 4.1 \ Anthropic

Getting started We recommend upgrading from Opus 4 to Opus 4.1 for all uses. If you're a developer, simply use claude-opus-4-1-20250805 via the API. You can also explore our system card,

Introducing Claude Opus 4.5 \ Anthropic

Our newest model, Claude Opus 4.5, is available today. It's intelligent, efficient, and the best model in the world for coding, agents, and

computer use. It's also meaningfully better at

[Latest version of photovoltaic bracket technical specifications](#)

Larger than Marley's 335Wp panel, the new 410 Solar Photovoltaic Panel delivers a peak power of 410Wp to increase total power from a roof area, whilst allowing
