How does the new operator work in JavaScript?

The new operator uses the internal [] method, and it basically does the following: Initializes a new native object Sets the internal [] of this object, pointing to the Function prototype

Is JavaScript's "new" keyword considered harmful?

It is NOT 'bad' to use the new keyword. But if you forget it, you will be calling the object constructor as a regular function. If your constructor doesn't check its execution context then it won't notice that 'this'

new operator

In the specific case of throw, throw new() is a shorthand for throw new Exception(). The feature was introduced in c# 9 and you can find the documentation as Target-typed new expressions.

oracle database

Can anyone help me understand when to use :NEW and :OLD in PLSQL blocks, I'm finding it very difficult to understand their usage.

When to use "new" and when not to, in C++?

You should use new when you wish an object to remain in existence until you delete it. If you do not use new then the object will be destroyed when it goes out of scope.
