

Parent-child self-made solar power generator

Parent-child self-made solar power generator

Is there a CSS parent selector?

CSS is relatively fast to parse, but selecting parent tags requires a relatively significantly larger amount of processing. Using the `:has` selector, we can now select div elements which have a `p` children, or

python

How do I create a directory at a given path, and also create any missing parent directories along that path? For example, the Bash command `mkdir -p /path/to/nested/directory` does this.

javascript

jQuery parent of a parent Asked 16 years, 10 months ago Modified 9 years, 8 months ago Viewed 116k times

Call child component method from parent class

I had an exact situation where the Parent-component had a Select element in a form and on submit, I needed to call the relevant Child-Component's method according to the selected value

[More efficient way to do parent\(\).parent\(\).parent\(\) etc. in jquery](#)

In this script I'm writing, I find myself using `.parent()` up to seven times in a row to get

elements. While this works, it seems like there could/should be an easier way to do this/ function I'm u

Kill child process when parent process is killed

Iterate through all processes and kill every process that has your process as a parent (I guess you need to kill the child processes first). Here is explained how you can get the parent

How to DIY a Solar Power Generator : 6 Steps

In this Instructable, you'll learn how to build your own DIY solar power generator using basic components like a solar panel, battery, inverter, and charge controller.

[How to style child components from parent component's CSS file?](#)

.parentChild { // Styles for child } But the child styles are not getting applied to the child components. I tried using styleUrls to include the parent 's stylesheet into child component to solve

[I cannot add the parent directory to *safe.directory* in Git](#)

EDIT: As we found out in the comments below, the owner of the parent of the directory containing the .git folder (the git repository) is the issue. Cloning the project anew is a platform

python

You shouldn't use it for importing modules from

parent folder in programs used by other people. Some examples where it doesn't work (quote from this Stack Overflow question): o it can't be

[Maven:Non-resolvable parent POM and 'parent.relativePath' points at](#)
