

Peak-valley electricity price arbitrage energy storage project

Overview

This project integrates a 1MW rooftop PV system with an 0.86MWh energy storage system at a large Mediterranean supermarket, delivering a fully off-grid, optimized energy solution for peak shaving, valley filling, and negative tariff arbitrage.

[Peak-valley electricity price energy storage arbitrage](#)

We investigate the profitability and risk of energy storage arbitrage in electricity markets under price uncertainty, exploring both robust and chance-constrained optimization

Energy storage peak-valley arbitrage case study

In provinces that implement peak and valley electricity prices, the Demand-side battery strategy could help users reduce electricity bills and achieve peak-to-valley arbitrage.

When the wind-PV-BESS is connected to the grid, the BESS stores the energy of wind-PV farms at low/valley electricity price, releases the stored energy to the grid at high/peak electricity
