RTX 2080 FTW3 ULTRA Hotspot Temperature high?

dropbox /s/a4l2h2dl9ei8rlw/icue.jpg (Temp 3 in the GPU section is hotspot temp) Keep in mind the room temperature at the time was 26.4C (its a standalone temperature device on top of my monitor.

Erratic GFlops (?)

Updated to bios 83. Definitely made a general speed difference but didn't change my benching issues. I'm currently following up on another detail - the benching issue seems to be Linpack related. The

Cannot unlock voltage for GTX 560 non Ti?

I installed that latest beta you linked me to. Tried to move the voltage up a notch and hit "apply". It kicks it right back down to stock level. I even tried to under volt it 1 notch. Same results. Kicked it right

Tomb Raider Sale!!

Yeah TR is a amazing looking game with settings maxed out. The TressFx hair effect is as real as it gets. Demanding for sure, with 2 670 FTWs I avg 77-80 fps. I picked it up in the summer sale for like

GTX 460s up at newegg.

a friend of mine that wants to do gpu rendering in the 3d industry wanted to build a budget render machine ended up picking up two of these cards, Guess hes going to pick up an i7 a 3 way sli mobo

Concerning Physx

If a video card is used as a dedicated physx card does it draw as much power?? Seems to me if it isn't hooked up to a monitor it whould draw less power. Was gonna use a 260 GTX as one,

Baking a 280

This totally works! I had an Evga 8800 Ultra die

on me back in December and like others did not register it within the 30 days of purchase. Learned my lesson on that. After removing the plastic fan housing I

5th place and dropping

Things may have averaged out better if all five of the top teams had to average their scores with one of the bottom five teams. Maybe this could be the start of a new challenge, something called a "Tag
