[In mathematics, when referring to pure numbers is largest or biggest](#)

When referring to a list of number is largest or biggest correct? For example, I want to find the biggest number in an array. Or should it be the largest number. Finally, would either biggest or

H1 2025: China installs more solar than rest of the

China was responsible for installing a massive 256 GW of that solar capacity. For context, it took until September last year to pass the 350 GW

Solar Power by Country 2026

As of 2023, China has the largest solar energy capacity in the world at 609,921 megawatts (MW), contributing approximately 3% to the country's total

[Is it fine to use "the second largest" when comparing 3 things](#)

Second largest works, but the phrase that first came to mind for me when I read your question

was, next to largest. I think I'd use that in this case. Intermediate feels more like a word that

Largest solar power stations in China

China presently is on the top of the list to have the largest solar resources in the world, with about 40 GW expected to be operational by 2020, bringing the country's overall solar generation (installed

[How should we describe the largest group in a set when its share](#)

The largest share of the region's cost estimate total belongs to projects classified as "long term", which accounts for 9% of the region's projects and 47% of the region's cost estimate total.

[What is the difference between "largest" and "biggest"?](#)

What is the largest lake in the world? Compare this to 'the biggest lake'. To my mind, the largest is the one with the greatest surface area, the biggest may have a smaller surface area but be deeper and

[China opens world's biggest solar farm that spreads](#)

China has just connected what it believes to be the world's biggest solar power plant to the grid in northwestern Xinjiang.

grammar

Would it be ok to say "from smaller to larger" or

do I have to say "from smallest to largest" E.g., I'm using the batteries from smallest/smaller to largest/larger capacity.

Solar by the Numbers: Midong Is China's Latest Mega

The installation, located in Urumqi in the northwestern region of Xinjiang, in the Gobi Desert of China, has 3.5 GW of generation capacity, and at

Solar energy in China

Rapid solar capacity expansion overwhelms the grid, PV manufacturers compete for market shares, and then large target markets slap

[Solar power farms on plateau fuel China's green energy revolution](#)

Today, covering an area of 609 square kilometers, this solar power base boasts a power generation capacity of 8,430 megawatts, making it the largest in the world, according to Qeyang,

phrases

In "the single largest factor", "single" is technically redundant, save for excluding the possibility of joint winners. When used (by someone who understands the language) it's serves as an

[China's solar capacity installations grew rapidly in 2024](#)

["Lunch" vs. "dinner" vs. "supper" - times and meanings?](#)

Dinner is considered to be the "main" or largest meal of the day. Whether it takes place at noon or in the evening is mostly a cultural thing. For instance, many people who grew up in the

[World's Largest Solar Farms 2025: Complete Guide To Mega Projects](#)

The world's largest solar farm, China's Gonghe Talatan Solar Park, generates 17,898 GWh annually from its 15.6 GW capacity. This is enough to power several million homes.

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility

word usage

What about the second pie chart? In the second pie chart the largest portion is less than 50%. Can I still consider the group "c" as majority in it? Based on the Cambridge Dictionary it seems

mathematics

a) 7 is the smallest and 9 is the greatest number or b) 7 is the smallest and 9 is the largest number The research so far indicates that both terms largest and greatest are used in
