### How do I get the current user's username in Bash?

If you want to get the fullname and not the user id, you can get from /etc/passwd and get your line with grep; or simpler with id -P which get the line for the current user; and, in all case, something like that:

### What is the purpose of "pip install --user" ?

The --user option modifies all pip commands that accept it to see/operate on the user install folder, so if you use pip list --user it will only show you packages installed with pip install --user.
