

# World photovoltaic panel production

## Overview

---

due its geographical and climate properties is well-suited for the solar energy utilization. According to the the country is capable of producing 1850 kWh/m per year. For comparison European countries are capable of around 1000 kWh/m per year on average. Two main panel types utilized in are the and panels. The.

## World photovoltaic panel production

---

### [Top 10 Countries Leading Solar Panel Production 2025](#)

In the latest consolidated data, global PV module production reached 726 GW and manufacturing capacity reached 1,405 GW/year, with 83%

### **IEA: Global photovoltaic module production capacity**

According to the International Energy Agency (IEA), global solar panel production capacity will exceed 1.5TW by 2035. Its latest report, Energy

### **Global photovoltaic electricity production**

China is the world leader, accounting for 47% of global installed solar capacity. Brazil has made particularly strong progress (80% from 2021 to 2022, 40% from 2023 to 2024), its output is

### **Snapshot of Global PV Markets**

PV energy production reached more than 10% of the world electricity consumption for the first time. The theoretical penetration rate of PV has grown across the world as capacity increases faster than

### **Executive summary - Solar PV Global**

## Supply Chains

Global capacity for manufacturing wafers and cells, which are key solar PV elements, and for assembling them into solar panels (also known as modules),

## Winter 2024 Solar Industry Update

In 2023, global PV production was between 400 and 500 GW. Despite global price drops across the PV supply chain, PV manufacturers have generally remained profitable, thanks to increases in sales
